Summary

A curious, creative, clean-code developer focused on making the best solutions for the problems at hand with the future in mind.

Experience

Ultraling | *Software Engineer* - April 2021 => Present

Creating implementation strategies for incrementally migrating PHP web app to ReactJS/API structure. Work on customizing OHIF Viewer for use/upgrade in existing web application.

DataXstream | *UI Developer* - July 2019 => March 2021

UI development for custom SAP-based web application OMS+. Lead client feature projects for the front-end team. Spearhead use and migration of clean coding patterns in product and client repositories. Collaborate with SAP functional consultants and ABAP engineers to design, develop, and enhance UI/UX for product features.

Projects

SOCO DUMPS | <https://www.socodumps.com/>

A web application designed to allow local users to view Southampton County, VA waste disposal sites sorted by geolocated proximity and open hours.

BUSINESS CLASS CLEANERS | <https://www.businessclasscleaners.com/>

An informational website highlighting business features with a contact form for an office cleaning company in the Tidewater area of Virginia.
