Email: Drewbird87@gmail.com

Summary

A curious, self-*teaching* developer concentrated on creating sensible solutions with suitable web technologies. Primarily focused on developing for the front-end, I am continuously improving towards becoming a full-stack developer. And I am willing to learn any technology or methodology to serve an organization.

Projects

MEMORIZE-ME - https://memorize-me.netlify.com/

A JavaScript memory game built using React, React hooks, and styled-components.

SOCO DUMPS - https://www.socodumps.com/

A web application designed to allow local users to view Southampton County, VA waste disposal sites sorted by geolocated proximity and open hours.

BUSINESS CLASS CLEANERS - https://www.businessclasscleaners.com/

An informational website highlighting business features with a contact form for an office cleaning company in the Tidewater area of Virginia.

FORKIFY - https://forkify-recipies.netlify.com/

Web Application utilizing Food2Fork API (Limit 50/day) to render recipe information from JSON database. Employs Model-View-Controller (MVC) methodology for data retrieval and DOM manipulation
